

# WIMMER NEW PRODUCTS - 2009

**BAFFLE BRAIDZ** is an exciting new flexible exhaust baffle system which fit into curved or radius pipes. With baffle laws being enforced more and more, bike owners are forced to either put in baffles or keep paying high (NO BAFFLE) tickets.

Made of 304 stainless, they will last for years. These baffles will quiet bikes 10 to 15 db's while increasing HP & torque. They can provide just enough back pressure to fine tune engines.

Great for fabricated or homemade pipes. They are a very handy & simple solution if you have baffle laws in your state or one you are riding thru.

Simple one screw installation, removable and can be wrapped for further muffling. Fits 1-3/4" or 2-1/4" pipes (\$109.99) and the 3" baffles (\$150) are designed just for Reinhart Duals.

**THE AIRSTAR COVER**, which comes in 3 different finishes, is an inexpensive way to give you an alternative look by fitting over your stock cover. It can fit over your stock HD Twin Cam cover, Ness Big Sucker or Screaming Eagle (along with the Wimmer Better Sucker). Simple one screw installation.
