

WIMMER

NEW PRODUCTS - 2009

THE BETTER SUCKER

The best suck for the buck out there! Independent tests have proven our own filter flows more air than all of the competition. We also offer a low priced "cleaning/recharging" kit which will maintain the filter throughout its lifespan and keep it looking like new so you can avoid fading and ultimate replacement.

The Better Sucker features Wimmer's exclusive IBS internal head breathing system. This system will help avoid oil mist from dripping all over your bike.

Any existing stock covers may be used with this intake, HOWEVER, we offer a variety of decorative covers and 4 filter colors allowing for performance AND style. We also keep you protected with an optional Rain Sock to fit.

The Better Sucker has standard versions to fit CV/Delphi (to '07) or the new drive-by wire setups. Other setups can be done by request.

As with all other Wimmer products, the Better Sucker is completely and proudly made in the USA.
