

# WIMMER THE EBS

The EBS Intake was originally designed for those who wanted to keep their stock look while increasing airflow and power all at an affordable price.

The EBS is designed to either fit under the stock cover or to stand alone with the optional decorative covers.

There are also 4 filter color choices allowing

for performance AND style. We

also keep you protected with an optional Rain Sock to fit.

The EBS features its own internal breathing system and velocity stack to increase velocity of airflow.

The EBS is designed to bolt directly on to any late model Harley (including Sportsters) with CV or fuel injection up to and including '09 models. Other fitments may be special ordered as well.

As with all other Wimmer products, the EBS is completely and proudly made in the USA.
